

FileCD[®] Pharmacy

Fast, Efficient Order Management for Pharmacies

FileCD Pharmacy is an innovative, powerful, easy-to-use pharmacy order management system that eliminates lost orders, increases productivity, reduces operating costs, and improves overall patient care.

Created specifically for hospital pharmacies, FileCD Pharmacy combines the latest in document imaging, workflow, and barcode technologies to streamline the processing and delivery of pharmacy orders.

Works the Way You Do

With FileCD Pharmacy, each time a physician examines a patient and fills out a prescription order, that form is quickly and easily scanned (right at the nursing station) directly into the FileCD Pharmacy system. FileCD Pharmacy then routes and prioritizes all scanned orders based on patient demographics, originating nursing stations, and order types (STAT, routine, and hold orders), and places the orders into the appropriate work queue.

Next, by looking at a visual image of the order, pharmacists can add any relevant data to the order before entering it into the pharmacy information system. If a doctor's handwriting is illegible, FileCD Pharmacy's convenient "print-back" feature directs the order back to the appropriate nursing station for clarification.

Once an order has been filled, FileCD Pharmacy stores it in a digital library. Your authorized personnel can then create reports from the archived data, documenting productivity levels, spotlighting any points in your workflow that may need improvement, and detailing all clinical interventions.

Put FileCD Pharmacy to work for you, and your staff will never have to wait for a returned phone call to fill an order, or experience other delays. FileCD Pharmacy dramatically decreases the time required to get your patients the medications they need.

FileCD Healthcare Supports Your Organization

FileCD Pharmacy is a component of the flexible FileCD Healthcare product family, integrating Document Management and MPI Integrity systems for Admitting, Business Offices, Medical Records, Laboratories and Pharmacies. Designed to adapt to the needs of your growing organization, FileCD Healthcare helps you quickly and easily transform any departmental application into an enterprise-wide implementation.

Only FileCD Pharmacy

- Reduces the turnaround time for orders; eliminates lost orders
- Improves patient and medication safety by leveraging reliable scanning and barcode technologies
- Minimizes transcription errors through use of high-quality images
- Enables customization of workflow to balance work-load among pharmacists
- Reduces paper document management costs through electronic storage and routing
- Supports simultaneous order access throughout an organization
- Improves HIPAA compliance

Features

- Intuitive and easy to use. FileCD Pharmacy uses a “file cabinet” system to organize documents.
- Route and prioritize orders based on patient demographics, originating nursing stations and order types (STAT, routine, and hold orders).
- Track orders in real-time, from the nursing stations to the pharmacy.
- Link with most Pharmacy Information Systems with a single key stroke.
- Find archived orders in seconds with powerful database search capabilities.
- Duplicate an order, and file the copy in a new folder.
- Customizable clinical interventions module to supplement the Pharmacy Information System.
- Generate comprehensive reports on clinical interventions.
- View, zoom, rotate, print, fax or e-mail any order directly from a PC.
- Add text, highlights, sticky notes, and even voice annotations to an order.
- Improve the accuracy of patient tracking and identification with barcode technologies.
- Provide HIPAA compliant security and audit trails.
- Open, customizable and built on Internet and client/server architectures.
- Support high-speed scanners, digital copiers, fax servers and signature pads.

Don't wait for the “next generation” in clinical document management. FileCD Pharmacy is here today! Contact TeleFile at **(650) 212-3453** or visit **filecd.com** for more information.
